“Action to Implement Management that is Conscious of Cost of Capital and Stock Price”

■ Cost of shareholders' equity recognized as 5–6% and ROE targeting investors' guideline of 8% or more

- ✓ While ROE has remained above our estimated cost of shareholders' equity for the past 10 years, excluding fiscal years with special factors*, we recognize that the level is low.
- ✓ As factors behind PBR below 1, we have identified sluggish ROE as well as low PER due to inadequate understanding of sustainable growth by investors (PER below the guideline of 15).
